August 24-27, 2020

Going on this week:  
Continuing work on cement-block foundation walls

Remember the half-finished wall from last week? Here it is now!

Here it is from the opposite side!

Here it is from the far west end!

Looking back at the site from far SW corner

August 17-20, 2020

Going on this week:  
Setting cement block  
foundation

1. Cement block delivery, Step One

To see a video of the construction site,  
return to Building Project home page  
and click on photo with this  
symbol in the middle

2. Cement block delivery, Step Two

3. Mortar mixing station (for cement block wall  
soon to rise in the construction pit beyond)

4. Tuesday's progress!

5. Thursday: Tier one in place; setting up  
to add second tier of foundation wall

Long view of cement-pouring, from playground

To see a video of the construction site, return to Building Project home page and click on photo with this symbol in the middle

August 13, 2020

Going on this week: concrete footings get poured; start setting cement blocks

Here comes the cement!

Footings all poured!

Business end of the cement delivery process

Big day Thursday: Delivery of cement blocks and steel beams

August 7, 2020

Going on this week:  
setting up the rebar  
and pouring the  
concrete footings

To see a video of  
the construction  
site, return to  
Building Project  
home page and  
click on photo with  
this symbol in the  
middle

Looking N from playground

Looking back over the site toward playground

Looking NW from playground

First truckload has been poured  
for the footings. Five more to go.

July 30, 2020

Going on this week:  
moving excavated dirt out of the way  
(for foundation)

To see a video of the construction site,  
return to Building Project home  
page and click on photo with  
this symbol in middle

- ⇒ Go scoop dirt from the pile.
- ⇒ Trundle it along the outer rim of the construction site.
- ⇒ Dump the dirt into waiting truck.
- ⇒ Repeat.

Composite view looking N from playground

July 23, 2020

Going on this week: preparing the slab site for pouring the footings

Views looking S from back (kitchen side) of Jones Bldg

July 16, 2020

Going on this week:  
more dirt moving,  
drainage measures

To see a panorama of the construction site,  
return to Building Project home  
page and click on photo with  
this symbol in middle

1. At west end of playground, beyond an orange digger, is a huge pile of dirt.

2. Beyond that, high on the far west rim of the dug-out site, there's a white digger beside another pile of dirt.

3. Let's go around and get a close-up view from the other side...

4. Close enough!

5. Looking back over the site to our original point of view from the playground and that huge pile of dirt.

6. This view shows measures being taken to de-moistify "Room H" so it can be rendered usable as a classroom.

July 9, 2020

3 views from Jones Bldg SW corner  
(from playground outside lower level classrooms)

To see a VIDEO view of the construction site, return to Building Project home page and click on photo with this symbol in middle

Going on this week:  
Erosion control,  
utility relocation,  
and grading for  
building pad

2 views from Jones Bldg west side  
(just outside kitchen window)

Please do not enter the designated construction site!

Instead, see site photos and videos by authorized agents!

July 1, 2020

This week: digging to find underground pipes'n'stuff—  
See what the site looks like, here!

3 views from alcove doors  
(between kitchen and stage)
